

USER EMPATHY MAP

Team ID: SWTID-2026-3238 | Project Name: PocketSmart AI | Track: AI-ML & Generative AI

1. Target User Persona: The Budget-Conscious Planner

Targeted personas include college students organizing graduation parties, young professionals furnishing new rental apartments, and shoppers looking for matching jewelry for weddings or celebrations.

2. Quadrant Analysis (Says, Thinks, Does, Feels)

Empathy Dimension	Observed User Insights & Realities
Says	"I have Rs. 30,000 for my living room; tell me exactly how much to spend on a couch vs. lighting." / "Can this jewelry match my blue traditional dress?"
Thinks	"I worry I'll spend too much on food and have no budget left for decorations." / "I wish an assistant would give me direct shopping links within my budget."
Does	Opens 15+ browser tabs, uses calculator apps, creates complex spreadsheets, and abandons shopping carts when costs spiral out of control.
Feels	Overwhelmed by choice overload, anxious about unexpected costs, and frustrated by generic non-personalized shopping search bars.
