

CUSTOMER JOURNEY MAP

Team ID: SWTID-2026-3238 | Project Name: PocketSmart AI | Track: AI-ML & Generative AI

1. End-to-End User Experience Lifecycle

- **Stage 1 (Discovery & Auth):** User discovers PocketSmart AI, reviews planning capabilities, and registers a secure account.
- **Stage 2 (Parameter Configuration):** User navigates to a planner (Home, Party, or Jewelry), inputs financial limit, dimensions/headcounts, and optionally attaches outfit photo.
- **Stage 3 (Hybrid Processing):** FastAPI calculates mathematical allocation while concurrently prompting Gemini for multimodal recommendations.
- **Stage 4 (Results & Action):** User receives visual allocation graphs, structured recommendation cards, and one-click provider search links.
- **Stage 5 (History & Retention):** Plan is persisted to SQLite; user accesses historical logs in dashboard for future review.
