

PROBLEM-SOLUTION FIT CANVAS

Team ID: SWTID-2026-3238 | Project Name: PocketSmart AI | Track: AI-ML & Generative AI

1. Problem-Solution Fit Mapping

Canvas Dimension	PocketSmart AI Solution Architecture
Target Customer	Budget-conscious consumers, apartment renters, DIY event hosts, and fashion-conscious shoppers.
Core Problem	Manual budget estimation is error-prone, shopping search engines lack financial guardrails, and styling advice is expensive.
Unique Value Proposition	A hybrid AI budget planner that splits money mathematically and generates bespoke, multimodal AI recommendations in seconds.
Unfair Advantage	Zero-failure offline architecture combined with real-time outbound links directly to trusted Indian and global retail giants.
