

PROPOSED SOLUTION & SYSTEM BLUEPRINT

Team ID: SWTID-2026-3238 | Project Name: PocketSmart AI | Track: AI-ML & Generative AI

1. System Concept & Value Proposition

PocketSmart AI addresses the financial blind-spots of online shopping by acting as a smart pre-purchase budget optimizer. Instead of unguided shopping, users configure constraints upfront and receive actionable, categorized allocations with AI styling enrichment.

2. Key Innovations

- **Hybrid Intelligence:** Combines predictable mathematical splits with dynamic LLM recommendations.
- **Multimodal Vision Stylist:** Processes user outfit photos using Gemini Vision to extract color tones and recommend complementary jewelry metals.
- **High Availability Fallback:** Automatic fallback ensures 100% operational uptime without API dependencies.
